|     | Kirby Road between Virginia Avenue and North Bend Road in Northside and College Hill. Project also covers landslides and storm drainage adjacent to the pavement.                                                                                                                                                                                                                                                                                                                                                     |
|     | (see attached map)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|     | PROJECT ZIP CODE: <u>45223</u> B: PROJECT COMPONENTS:                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|     | Reconstructed pavement will be full depth ashphalt with concrete curb and gutter and new inlets. Landslide correction involves construction of 1,250 linear feet of retaining wall consisting of reinforced concrete drilled shafts and precast panels. Guardrail will be constructed in front of the drilled shaft walls. A combination retaining wall/concrete ditch will be built on the uphill side to maintain flow within the ditch. Rehabilitated pavement will consist of three inches of asphlatic concrete. |
|     | C: PHYSICAL DIMENSIONS:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|     | Project covers 10,680 linear feet, and ranges from two to three lanes wide.                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| [ ] A certified copy of the legislation by the governing body of the applicant authorizing a designated official to sign and submit this application and execute contracts. This individual should sign under 7.0, Applicant Certification, below.                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| [X] A certification signed by the applicant's chief financial officer stating <u>all local share</u> funds required for the project will be available on or before the dates listed in the Project Schedule section. If the application involves a request for loan (RLP or SCIP), a certification signed by the CFO which identifies a specific revenue source for repaying the loan also must be attached. Both certifications can be accomplished in the same letter.                                                                                                                                                                                                            |
| [X] A registered professional engineer's detailed cost estimate and useful life statement, as required in 164-1-13, 164-1-14, and 164-1-16 of the Ohio Administrative Code. Estimates shall contain an engineer's <u>original seal or stamp and signature</u> .                                                                                                                                                                                                                                                                                                                                                                                                                     |
| [NA] A cooperation agreement (if the project involves more than one subdivision or district) which identifies the fiscal and administrative responsibilities of each participant.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| [NA] Projects which include new and expansion components <u>and</u> potentially affect productive farmland should include a statement evaluating the potential impact. If there is a potential impact, the Governor's Executive Order 98-VII and the OPWC Farmland Preservation Review Advisory apply.                                                                                                                                                                                                                                                                                                                                                                              |
| [ ] Capital Improvements Report: (Required by O.R.C. Chapter 164.06 on standard form)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| [X] Supporting Documentation: Materials such as additional project description, photographs, economic impact (temporary and/or full time jobs likely to be created as a result of the project), accident reports, impact on school zones, and other information to assist your district committee in ranking your project. Be sure to include supplements which may be required by your <i>local</i> District Public Works Integrating Committee.                                                                                                                                                                                                                                   |
| 7.0 APPLICANT CERTIFICATION:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| The undersigned certifies that: (1) he/she is legally authorized to request and accept financial assistance from the Ohio Public Works Commission; (2) to the best of his/her knowledge and belief, all representations that are part of this application are true and correct; (3) all official documents and commitments of the applicant that are part of this application have been duly authorized by the governing body of the applicant; and, (4) should the requested financial assistance be provided, that in the execution of this project, the applicant will comply with all assurances required by Ohio Law, including those involving Buy Ohio and prevailing wages. |
| Applicant certifies that physical construction on the project as defined in the application has NOT begun, and will not begin until a Project Agreement on this project has been executed with the Ohio Public Works Commission. Action to the contrary will result in termination of the agreement and withdrawal of Ohio Public Works Commission funding of the project.                                                                                                                                                                                                                                                                                                          |

Mr. Lawrence Bicking, Director Ohio Public Works Commission 65 East State Street, Suite 312 Columbus, Ohio 43215 Suite 250, City Hall 801 Plum Street Cincinnati, Ohio 45202 Phone (513) 352-3731 Fax (513) 352-2370

William E. Moller

RE: Status of Funds for Local Share of 2003 SCIP/LTIP Project Grants

Dear Mr. Bicking:

The local matching shares for the following 2003 SCIP/LTIP Projects (Round 17 Funding) are recommended by the City Manager for funding in the City's 2003 Capital Improvement Program:

#### STREET REHABILITATION PROJECTS

Madison Road — Brotherton to Edwards Queen City Avenue — Harrison to White Gilbert Avenue / Montgomery Road — Elsinore to Brewster Dixmyth Avenue — M. L. King to Clifton Vine Street — Erkenbrecher to Mitchell Eastern Avenue — Wortman to Columbia Parkway

#### STREET IMPROVEMENT PROJECTS

Kirby Road Improvements – Virginia to North Bend Madison Road / Red Bank Expressway Improvements Queen City Avenue Improvements – White to Wyoming

The matching funds for these projects are coming from Street Improvement Bonds and from Cincinnati Southern Railway lease proceeds.

If you have any questions or need additional information regarding these projects, please contact me at 513-352-6275.

Sincerely

William E. Moller Director of Finance

#### COUNCIL OF THE CITY OF CINCINNATI

#### STATE OF OHIO

#### OFFICE OF THE CLERK OF COUNCIL

I HEREBY CERTIFY that the foregoing transcript is correctly copied from the books, papers and journals of the City of Cincinnati, State of Ohio, kept under authority and by the direction of the Council thereof.

ORDINANCE 0351-2003 passed by the Council of the City of Cincinnati at their session on October 22, 2003 entitled:

ORDINANCE, (EMERGENCY) submitted by Valerie A. Lemmie, City Manager on 10/15/2003, authorized the City Manager to apply for and accept street rehabilitation and street improvement funding grants, loans and loan assistance from the State of Ohio, Ohio Public Works Commission, in the approximate amount of \$11,250,600, and to execute any agreements necessary for the receipt and administration of said grants and loans.

#### IN TESTIMONY WHEREOF I have

hereunto set my name and affixed the seal of the Clerk of Council

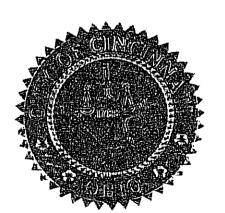

nt.

Office this \_\_\_\_28<sup>th</sup> day of

October in the year Two Thousand and Three.

Robert A. Neely,

Deputy Clerk

# City of Cincinnati

# An Ordinance No. 351

-2003

AUTHORIZING the City Manager to apply for and accept street rehabilitation and street improvement funding grants, loans and loan assistance from the State of Ohio, Ohio Public Works Commission, in the approximate amount of \$11,250,600, and to execute any agreements necessary for the receipt and administration of said grants and loans.

WHEREAS, the State Capital Improvement Program, the Local Transportation Improvement Program, and the State Revolving Loan Program provide for infrastructure funding; and

WHEREAS, the District 2 Integrating Committee is accepting applications for projects within Hamilton County, State of Ohio; and

WHEREAS, the City of Cincinnati has the required \$2,633,957 in matching City funds for Program Year 2004, for six (6) street rehabilitation projects, namely Central Parkway, Gilbert Avenue/Montgomery Road, Madison Road, M.L. King Drive, Vine Street (Central Parkway to McMicken) and Vine Street (Erkenbrecher to Mitchell); four (4) street improvement projects, namely Colerain Avenue/Blue Rock Road; Columbia Parkway, Kirby Road, and Red Bank Road/Duck Creek Road; one (1) street rehabilitation/improvement project, namely River Road; and one (1) loan assistance application, namely Infrastructure Rehabilitation Bonds; now, therefore,

BE IT ORDAINED by the Council of the City of Cincinnati, State of Ohio:

Section 1. That the City Manager is hereby authorized to execute and file applications, on behalf of the City of Cincinnati, with the Ohio Public Works Commission through the Hamilton County District 2 Integrating Committee, for grants, loans, and loan assistance in the approximate amount of \$11,250,600 for funding six (6) street rehabilitation projects, namely Central Parkway, Gilbert Avenue/Montgomery Road, Madison Road, M.L. King Drive, Vine Street (Central Parkway to McMicken) and Vine Street (Erkenbrecher to Mitchell); four (4) street improvement projects, namely Colerain Avenue/Blue Rock Road; Columbia Parkway, Kirby Road, and Red Bank Road/Duck Creek Road; one (1) street rehabilitation/improvement project, namely River Road; and one loan assistance application, namely Infrastructure Rehabilitation Bonds, and to accept such grants and loans at an interest rate acceptable to the City of Cincinnati Director of Finance if awarded by the Ohio Public Works Commission.

Section 2. That the City Manager is hereby authorized to execute such agreements and other documents as are required by the State for receipt and administration of the above grants and loans.

Section 3. That this ordinance shall be an emergency measure necessary for the preservation of the public peace, welfare and safety and shall, subject to the terms of Article II, Section 6 of the Charter, be effective immediately. The reason for the emergency is the immediate need to comply with critical application deadlines and to ensure that funding mechanisms for the proper implementation are in place at the earliest possible time.

Passed / Ctober 22, 2003

I HEREBY CENTIFY THAT ORDINANCE NO. 351-2003
WAS PUBLISHED IN THE CITY BULLETIN
IN ACCORDANCE WITH THE CHARTER ON. 11-4-2003

Clerk of Council

#### Kirby Road Improvements

Virginia to North Bend

### CERTIFICATION OF TRAFFIC COUNT

As required by the District 2 Integrating Committee, I hereby certify that the traffic counts herein attached to the <u>Kirby Road – Virginia to North Bend</u> project application are a true and accurate count done by the City of Cincinnati's Traffic and Road Operations Division.

Stephen I. Niemeier, P.E. Supervising Engineer

# ADDITIONAL SUPPORT INFORMATION Kirby Road Improvements

For Program Year 2003 (July 1, 2003 through June 30, 2004), jurisdictions shall provide the following support information to help determine which projects will be funded. Information on this form must be accurate, and where called for, based on sound engineering principles. Documentation to substantiate the individual items, as noted, is required. The applicant should also use the rating system and its' addendum as a guide. The examples listed in this addendum are not a complete list, but only a small sampling of situations that may be relevant to a given project.

IF YOU ARE APPLYING FOR A GRANT, WILL YOU BE WILLING TO ACCEPT A LOAN IF ASKED BY THE DISTRICT? \_\_\_\_YES \_\_X\_\_NO (ANSWER REQUIRED) Note: Answering "Yes" will not increase your score and answering "NO" will not decrease your score.

#### 1) What is the physical condition of the existing infrastructure that is to be replaced or repaired?

Give a statement of the nature of the deficient conditions of the present facility exclusive of capacity, serviceability, health and/or safety issues. If known, give the approximate age of the infrastructure to be replaced, repaired, or expanded. Use documentation (if possible) to support your statement. Documentation may include (but is not limited to): ODOT BR86 reports, pavement management condition reports, televised underground system reports, age inventory reports, maintenance records, etc., and will only be considered if included in the original application. Examples of deficiencies include: structural condition; substandard design elements such as widths, grades, curves, sight distances, drainage structures, etc.

Drainage System: Street and residence ponding occurs during low intensity minfall events due to a failing collection system. The pavement is about 1 foot above the adjacent sidewalks and drive aprons in many areas. The catch basins present are inefficient in collection of the runoff due to system deterioration, erosion, nutting and debris. This results in ponding in the right-of-way and in the driveway aprons of residences. The severage system is over 50 years old and is in very poor/critical condition. Please refer to attached the photographs, complaints and inspection reports provided as documentation.

Pavement: The pavement is in very poor condition due to severe cracking and significant base failures. A sampling of the pavement records for the jurisdiction as well as pictures are included to document the condition.

Landslide Correction: Nine landslides occur along Kirby Road from approximately 1.100 feet south of Glenview Avenue to North Bend Road. The landslides occur on the downhill side of the roadway and affect the inbound travel lane. Continued movement of the landslides causes cracking and settlement of the roadway requiring constant maintenance. The condition of the landslide component of the project is failed and requires immediate corrective measures. Please refer to the pictures and brief explanation for documentation of condition.

#### 2) How important is the project to the safety of the Public and the citizens of the District and/or service area?

Give a statement of the projects effect on the safety of the service area. The design of the project is intended to reduce existing accident rate, promote safer conditions, and reduce the danger of risk, liability or injury. (Typical examples may include the effects of the completed project on accident rates, emergency response time, fire protection, and highway capacity.) Please be specific and provide documentation if necessary to substantiate the data. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.

Type of Safety Problem:

Landslides. Nine landslides occur along Kirby Road from approximately 1100 feet south of Glenview Avenue to North Bend Road. The landslides occur on the downhill side of the roadway and affect the inbound travel lane. Drilled pier walls were constructed in 1993 and in 1996 to stabilize two of the nine landslides. Sudden drastic movement of one of the seven remaining active landslides occurred in June of 2002 causing the emergency closure of Kirby. A drilled pier wall was constructed under an emergency change order to an existing project in order to promptly reopen the roadway. Continued movement of this and the other six landslides causes cracking and settlement of the roadway requiring constant maintenance and poses a constant safety threat to the motoring public because the roadway surface and guardrail are moving down the slide plane. As shown in June of 2002 the roadway is at risk of being completely closed if weather conditions cause a sudden drastic down slope movement of the pavement.

Drainage. Movement of the hillside on the uphill side of outbound Kirby Avenue continually blocks the drainage ditch: as a result, runoff is diverted from the ditch and across the roadway surface. In addition, the failing sewerage system leads to ponding water adjacent to the street and allows flooding in the basements of the property owners on Kirby Road.

Pavement. The navement requires extensive rehabilitation to maintain integrity due to landslides, poor drainage utility outs, notholes, longitudinal gracking and base failures.

| Corrective Actions:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The landslide correction, storm water mitigation and pavement condition are of highly significant importance to                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| safety of the public. The project will correct the deficiencies listed under the type of safety problem and allow                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| roadway and adjacent infrastructure to meet the safety design standards and codes. The improvements would previous the landslides by constructing 1.470 linear feet of retaining wall consisting of reinforced concrete drilled shafts a                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| precast panels. Guardrail will be constructed in front of the drilled shaft retaining walls (No guardrail is curren                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| present at these locations). A combination retaining wall/concrete ditch will be constructed on the uphill side                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| maintain flow within the ditch. The roadway profile from Ashtree to a few hundred feet past Mehmert will be lower                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| and allow the stormwater runoff to enter the new sewerage system instead of flowing into adjacent property. The many control of the stormwater runoff to enter the new sewerage system instead of flowing into adjacent property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| sewerage system will serve to prevent ponding and surcharge due to deteriorated lines along the remaining portions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 3) How important is the project to the health of the Public and the citizens of the District and/or service area?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Give a statement of the projects effect on the health of the service area. The design of the project will improve to overall condition of the facility so as to reduce or eliminate potential for disease, or correct concerns regarding to environmental health of the area. (Typical examples may include the effects of the completed project by improving adding storm drainage or sanitary facilities, replacing lead jointed water lines, etc.). Please be specific and provide documentation if necessary to substantiate the data. The applicant must demonstrate the type of problems that exist, the frequency and severity of the problems and the method of correction.  Type and Seriousness of Health Problem: |
| The proposed sewerage system will alleviate both ponding water on, and adjacent to the roadway, as well as preve wastewater from entering the basements of the residences due to surcharge on the system. The ponding and baseme flooding occur even in mild storm events: therefore, they pose rather serious health problems due to their chronic nature.                                                                                                                                                                                                                                                                                                                                                                  |
| Corrective Actions:  This project will improve the overall condition of the infrastructure by constructing new sewerage facilities. The construction of new facilities will eliminate the surcharge leading to wastewater in the basements. The road profile whe lowered as appropriate, to keep the runoff contained within the pavement drainage system.                                                                                                                                                                                                                                                                                                                                                                   |
| 4) Does the project help meet the infrastructure repair and replacement needs of the applying jurisdiction?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| The jurisdiction must submit a listing in priority order of the projects for which it is applying. Points will be awarded of the basis of most to least importance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Priority 1 Madison Road / Red Bank Expressway Improvements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|       | 10 - Complete ban, facility closed 8 - 80% reduction in legal load or 4-wheeled vehicles only 7 - Moratorium on future development, not functioning for current demand 6 - 60% reduction in legal load 5 - Moratorium on future development, functioning for current demand 4 - 40% reduction in legal load 2 - 20% reduction in legal load  10 - Less than 20% reduction in legal load | Appeal Score           |
| 14)   | What is the total number of existing daily users that will benefit as a result of the proposed project?                                                                                                                                                                                                                                                                                 |                        |
|       | 10 - 16,000 or more<br>8 - 12,000 to 15,999<br>6 8,000 to 11,999<br>4 - 4,000 to 7,999<br>2 - 3,999 and under                                                                                                                                                                                                                                                                           | Appeal Score           |
| 15)   | Has the jurisdiction enacted the optional S5 license plate fee, an infrastructure levy, a user fee, or de pertinent infrastructure? (Provide documentation of which fees have been enacted.)                                                                                                                                                                                            | dicated tax for the    |
|       | 3 - One of the above 0 - None of the above                                                                                                                                                                                                                                                                                                                                              | Appeal Score           |

#### ADDENDUM TO THE RATING SYSTEM

#### General Statement for Rating Criteria

Points awarded for all items will be based on engineering experience, field verification, application information and other information supplied by the applicant, which is deemed to be relevant by the Support Staff. The examples listed in this addendum are not a complete list, but only a small sampling of situations that may be relevant to a given project.

#### Criterion 1 - Condition

Condition is based on the amount of deterioration that is field verified or documented exclusive of capacity, serviceability, health and/or safety issues. Condition is rated only on the facility being repaired or abandoned. (Documentation may include: ODOT BR86 reports, pavement management condition reports, televised underground system reports, age inventory reports, maintenance records, etc., and will only be considered if included in the original application.)

#### **Definitions:**

<u>Failed Condition</u> - requires complete reconstruction where no part of the existing facility is salvageable. (E.g. Roads: complete reconstruction of roadway, curbs and base; Bridges: complete removal and replacement of bridge; Underground: removal and replacement of an underground drainage or water system; Hydrants: completely non functioning and replacement parts are unavailable.)

<u>Critical Condition</u> - requires moderate or partial reconstruction to maintain integrity. (E.g. Roads: reconstruction of roadway/curbs can be saved; Bridges: removal and replacement of bridge with abutment modification; Underground: removal and replacement of part of an underground drainage or water system; Hydrants: some non-functioning, others obsolete and replacement parts are unavailable.)

<u>Very Poor Condition</u> - requires extensive rehabilitation to maintain integrity. (E.g. Roads: extensive full depth, partial depth and curb repair of a roadway with a structural overlay; Bridges: superstructure replacement; Underground: repair of joints and/or minor replacement of pipe sections; Hydrants: non-functioning and replacement parts are available.)

<u>Poor Condition</u> - requires standard rehabilitation to maintain integrity. (E.g. Roads: moderate full depth, partial depth and curb repair to a roadway with no structural overlay needed or structural overlay with minor repairs to a roadway needed; Bridges: extensive patching of substructure and replacement of deck; Underground: insituform or other in ground repairs; Hydrants: functional, but leaking and replacement parts are unavailable.)

Moderately Poor Condition - requires minor rehabilitation to maintain integrity. (E.g. Roads: minor full depth, partial depth or curb repairs to a roadway with either a thin overlay or no overlay needed; Bridges: major structural patching and/or major deck repair; Hydrants: functional and replacement parts are available.)

Moderately Fair Condition - requires extensive maintenance to maintain integrity. (E.g. Roads: thin or no overlay with extensive crack sealing, minor partial depth and/or slurry or rejuvenation; Bridges: minor structural patching, deck repair, erosion control.)

Fair Condition - requires routine maintenance to maintain integrity. (E.g. Roads: slurry seal, rejuvenation or routine crack sealing to the roadway; Bridges: minor structural patching.)

Good or Better Condition - little to no maintenance required to maintain integrity.

**Note:** If the infrastructure is in "good" or better condition, it will **NOT** be considered for SCIP/LTIP funding unless it is an expansion project that will improve serviceability.

#### Criterion 2 – Safety

The jurisdiction shall include in its application the type, *frequency*, and severity of the safety problem that currently exists and how the intended project would improve the situation. For example, have there been vehicular accidents attributable to the problems cited? Have they involved injuries or fatalities? In the case of water systems, are existing hydrants non-functional? In the case of water lines, is the present capacity inadequate to provide volumes or pressure for adequate fire protection? In all cases, specific documentation is required. *Mentioned problems*, which are poorly documented, shall not receive more than 5 points.

Note: Each project is looked at on an individual basis to determine if any aspects of this category apply. Examples given above are NOT intended to be exclusive.

#### Criterion 3 – Health

The jurisdiction shall include in its application the type, frequency, and severity of the health problem that would be eliminated or reduced by the intended project. For example, can the problem be eliminated only by the project, or would routine maintenance be satisfactory? If basement flooding has occurred, was it storm water or sanitary flow? What complaints if any are recorded? In the case of underground improvements, how will they improve health if they are storm sewers? How would improved sanitary sewers improve health or reduce health risk? Are leaded joints involved in existing water line replacements? In all cases, specific documentation is required. Mentioned problems, which are poorly documented, shall not receive more than 5 points.

Note: Each project is looked at on an individual basis to determine if any aspects of this category apply. Examples given above are NOT intended to be exclusive.

#### Criterion 4 – Jurisdiction's Priority Listing

The jurisdiction <u>must</u> submit a listing in priority order of the projects for which it is applying. Points will be awarded on the basis of most to least importance. The form is included in the Additional Support Information.

#### Criterion 5 – Generate Fees

Will the local jurisdiction assess fees or project costs for the usage of the facility or its products once the project is completed (example: rates for water or sewer, frontage assessments, etc.). The applying jurisdiction must submit documentation.

#### Criterion 6 – Economic Growth

Will the completed project enhance economic growth and/or development in the service area?

#### **Definitions:**

<u>Directly secure significant new employment:</u> The project is specifically designed to secure a particular development/employer(s), which will add at least 100 or more new employees. The applicant agency must supply specific details of the development, the employer(s), and number of new permanent employees.

<u>Directly secure new employment:</u> The project is specifically designed to secure development/employers, which will add at least 50 new permanent employees. The applying agency must supply details of the development and the type and number of new permanent employees.

Secure new employment: The project is specifically designed to secure development/employers, which will add 10 or more new permanent employees. The applying agency must submit details.

Permit more development: The project is designed to permit additional business development. The applicant must supply details.

The project will not impact development: The project will have no impact on business development.

*Note:* Each project is looked at on an individual basis to determine if any aspects of this category apply.

#### Criterion 7 – Matching Funds - Local

The percentage of matching funds which come directly from the budget of the applying local government.

#### Criterion 8 - Matching Funds - Other

The percentage of matching funds that come from funding sources other than those mentioned in Criterion 7.

#### Criterion 9 – Alleviate Traffic Problems

The jurisdiction shall provide a narrative, along with pertinent support documentation, which describe the existing deficiencies and showing how congestion or hazards will be reduced or eliminated and how service will be improved to meet the needs of any expected growth or development. A formal capacity analysis accompanying the application would be beneficial. Projected traffic or demand should be calculated as follows:

#### Formula:

Existing users x design year factor = projected users

| Design Year | Design year factor |          |       |  |
|-------------|--------------------|----------|-------|--|
|             | Urban              | Suburban | Rural |  |
| 20          | 1.40               | 1.70     | 1.60  |  |
| 10          | 1.20               | 1.35     | 1.30  |  |

#### Definitions:

<u>Future demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service for twenty-year projected demand or fully developed area conditions. Justification must be supplied if the area is already largely developed or undevelopable and thus the projection factors used deviate from the above table.

<u>Partial future demand</u> -- Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service for ten-year projected demand or partially developed area conditions. Justification must be supplied if the area is already largely developed or undevelopable and thus the projection factors used deviate from the above table.

<u>Current demand</u> – Project will eliminate existing congestion or deficiencies and will provide sufficient capacity or service only for existing demand and conditions.

<u>Minimal increase</u> – Project will reduce but not eliminate existing congestion or deficiencies and will provide a minimal but less than sufficient increase in existing capacity or service for existing demand and conditions.

<u>No increase</u> – Project will have no effect on existing congestion or deficiencies and provide no increase in capacity or service for existing demand and conditions.

#### Criterion 10 - Ability to Proceed

The Support Staff will assign points based on engineering experience and status of design plans as demonstrated by the applying jurisdiction and OPWC defined delinquent projects. A project is considered delinquent when it has not received a notice to proceed within the time stated on the original application and no time extension has been granted by the OPWC. A jurisdiction receiving approval for a project and subsequently canceling the same after the bid date on the application may be considered as having a delinquent project.

#### Criterion 11 - Regional Impact

The regional significance of the infrastructure that is being repaired or replaced.

#### Definitions:

Major Impact - Roads: major multi-jurisdictional route, primary feed route to an Interstate, Federal Aid Primary routes.

Moderate Impact - Roads: principal thoroughfares, Federal Aid Urban routes

Minimal / No Impact - Roads: cul-de-sacs, subdivision streets

#### Criterion 12 – Economic Health

The District 2 Integrating Committee predetermines the jurisdiction's economic health. The economic health of a jurisdiction may periodically be adjusted when census and other budgetary data are updated.

#### Criterion 13 - Ban

The jurisdiction shall provide documentation to show that a facility ban or moratorium has been formally placed. The ban or moratorium must have been caused by a structural or operational problem. Points will only be awarded if the end result of the project will cause the ban to be lifted.

#### Criterion 14 - Users

The applying jurisdiction shall provide documentation. A registered professional engineer or the applying jurisdictions' C.E.O must certify the appropriate documentation. Documentation may include current traffic counts, households served, when converted to a measurement of persons. Public transit users are permitted to be counted for the roads and bridges, but only when certifiable ridership figures are provided.

#### Criterion 15 – Fees, Levies, Etc.

The applying jurisdiction shall document (in the "Additional Support Information" form) which type of fees, levies or taxes they have dedicated toward the type of infrastructure being applied for.

Note: the District 2 Integrating Committee adopted this rating system on May 2, 2003.
